

EXACT-ARTWORK LOGO SUITE + BRAND IDENTITY

Prepared for Matt Brown | Original logo preserved

Brand foundation

A consistent system built around the existing Three Doors artwork.

Three options. One trusted partner

The suite preserves the supplied logo's mark, wording, typography, proportions, gradients, and tagline. Only production treatments - background removal, exact cropping, approved color reversal, and layout packaging - have been applied.

- **TRUSTED**
Calm, dependable, and clear.
- **CHOICE-DRIVEN**
Three paths presented without pressure.
- **SOLUTIONS-FIRST**
Practical guidance for real property needs.
- **HUMAN**
Approachable, local, and partnership-oriented.

Logo suite

Three official logo families, all built directly from the supplied artwork.

PRIMARY LOGO

VERTICAL LOGO

ICON

Light and dark use

The full-color source is used on light fields; geometry is unchanged in the reverse treatment.

ORIGINAL COLOR ON IVORY

WHITE-AND-GOLD REVERSE ON NAVY

Brand colors

Navy and gold values were sampled from the supplied artwork and standardized.

THREE DOORS NAVY

#0A1832

RGB 10 / 24 / 50

CMYK approx. 80 / 52 / 0 / 80

THREE DOORS GOLD

#BE9641

RGB 190 / 150 / 65

CMYK approx. 0 / 21 / 66 / 25

WARM IVORY

#F7F4ED

RGB 247 / 244 / 237

CMYK approx. 0 / 1 / 4 / 3

Usage standards

Protect the supplied artwork and use the packaged files as delivered.

CLEAR SPACE

Keep open space around the logo equal to the visible width of the gold door.

LIGHT SURFACES

Use the original full-color file on white, ivory, or other pale backgrounds.

DARK SURFACES

Use the packaged white-and-gold reverse file on navy or suitably dark photography.

SMALL SIZES

Use the Primary logo while its tagline remains readable, then switch directly to the Icon.

ONE COLOR

Use navy, black, white, or gold monochrome files for limited-color production.

DO NOT ALTER

Do not redraw, retype, stretch, rotate, recolor, add effects, or change the proportions.

Package handoff

Everyday files, vendor files, and reusable digital assets.

PNG

Transparent full-color, reverse, and monochrome artwork for presentations, websites, email, and social media.

SVG

Exact-artwork SVG wrappers that preserve the supplied logo pixel-for-pixel without introducing a new trace or redraw.

EPS

Exact-artwork EPS files for print handoff, supplied on the intended light or dark background because EPS does not support modern alpha transparency.

IMPORTANT PRODUCTION NOTE

The supplied master is raster artwork. To honor the instruction not to recreate or reinterpret it, the SVG and EPS deliverables embed the exact original artwork rather than substituting an automatic vector trace. If a future vendor requires editable outlined paths, authorize a separate faithful tracing project and compare proofs against this package.
